

„We generate the best fit for your work shoes!“

You know what it's like: the protective work shoe is uncomfortable, doesn't fit properly, gives no support,.... but that's just the way it is, isn't it? WRONG!

German insurances in some cases will even support you, to have a well-fitting and supportive work-shoe... we can help you with that.

Sport- DONI beds you comfortably and safely in your work shoes with the help of proven, approved and individualized insoles in your shoes.

Here, finally, someone looks not only at the appearance of your shoes, but also at the shape of your feet and the way you move.

By customizing insoles to your foot shape, you are ensured better support and comfort in the shoe.

Especially at work, it is important to stand on a good footing so that you can maintain good posture. This, in turn, keeps you more efficient and fit through reduced pressure points in the shoe and less foot and muscle fatigue.

Advantages are: - improved stance, - increased concentration, - stronger movement control, - improved blood circulation, - faster recovery of the foot and leg muscles (after stress). In addition, a significantly more even wear of the shoe sole and thus longer durability of the shoe!

Insurance relevant:

In order for insurance coverage to apply in the event of an accident, it is essential that any modifications to a work shoe or to the bedding within it (e.g., by means of an insole) are manufactured in accordance with the design (BGR 191) and in accordance with certified manufacturing instructions.

Here the path, that you should follow to get maximum support from insurance carriers for your customized insole in the work shoe:

1. Download below all the documents that apply to you. As is typical for Germany, these do not exist in English and you will need someone to help you with the process.
2. If you have a safety officer and/or company doctor, it is best to fill in these documents with this expert as they will be able to directly answer your questions regarding administration and also reimbursement.
3. Ask for a certificate of necessity and bring it - together with your work shoes - to your appointment with us.
4. After our measurements, you will receive further documents (e.g., a cost estimate, measurement documentation and diagnostic documents) from us, which will be helpful to you for reimbursement.

5. Then we make your customized insoles in a single session: on your foot, for your shoe and in your presence. No breaking in, no "getting used to it" - soothing, natural fit from the first minute.

Reimbursement for customized foot protection

DRV (Deutsche Rentenversicherung) – if minimum contribution paid for 15 years

You need the following forms filled-in:

- G100
- G130
- „Notwendigkeitsbescheinigung des Arbeitgebers“ – certificate of necessity by the employer
- „Ärztliche Befundbericht“ - Medical report of findings (by a specialist for orthopedics)
- „Datenschutzerklärung“ – Data privacy statement

Agentur für Arbeit (if paid contribution to the pension fund for less than 15 years)
